

Hyde FC Revolution

FISH PROCESSING BLADES

If you can eat it, a Hyde blade probably cut it. Industrial strength stainless steel is laser cut, heat-treated and precision ground to ensure a clean cut and to meet stringent government standards. The reason is simple - professionals demand the best, since anything less may fail, wasting time and money. Hyde gives the seafood processing industry the edge it needs!

Whether you're looking for improved performance or to reduce scrap from poor cut quality, Hyde Industrial Blade Solutions has you covered.

The Latest Evolution of the Seafood Processing Blade

You spoke and we listened ... The FC Revolution blades from Hyde are the natural evolution of our seafood processing blade offering, based on input and feedback from the blade techs and machine operators at some of the largest seafood processing plants in North America.

FC Revolution blades offer enhanced corrosion resistance, even in the toughest of cutting environments. These blades are tensioned to run true, time after time, and that means better quality cuts and less potential for waste.

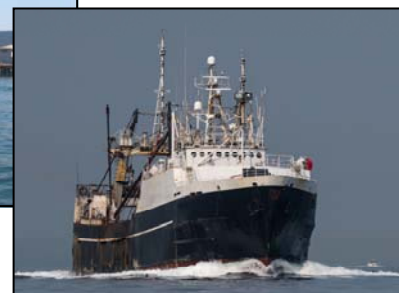

FC Revolution blades are sharper out of the package – there's no need to hone the blades prior to initial use. Also, they stay sharper longer, so you don't have to sharpen them as frequently. When you do sharpen, they take a fresh edge more quickly, with less material removal, which allows them to be sharpened more times than competitive blades.

Repeatable results, time after time, for peace of mind ... just what you'd expect from Hyde.

The bottom line – Hyde's new FC Revolution blades provide better cut quality with less scrap product and lower overall operating costs – a win-win for seafood processing operations. Call your local distributor today and ask for Hyde FC Revolution seafood processing blades.

"In-season, our lines run 24/7. We have to have blades that won't shut us down and Hyde's seafood blades are up to the job!"

FISH PROCESSING PLANT MANAGER

Hyde FC Revolution

FISH PROCESSING BLADES

Hyde FC Revolution seafood processing blades are designed for both fresh and salt water processing. With our proprietary manufacturing processes, FC Revolution blades will outperform and outlast the competition.

| Hyde Part # | OEM Part # | Blade Specification | | | | | | |
|-------------|----------------|---------------------|--------|------------|-------|-----------|--------|------------|
