

Loop Knife

HYDETM
Industrial Blade Solutions

Hyde's Loop Knife is designed for quick and safe removal of flash waste and excess material from molded or extruded rubber and plastic parts. This ergonomically designed knife can be used by righties or lefties and is easy on the hands. A simple, straight-forward solution ... just what you'd expect from Hyde!

The name that's been trusted by American craftsmen for over 135 years.

Long-Lasting High Carbon Steel Loop Knife

We start with a high carbon steel blank, then grind it, heat treat it and temper it to the high standards you demand. The handle is designed with a durable polypropylene core and thermoplastic elastomer soft grip covering to absorb the shock from scraping to ease stress on the user's hands, wrists and arms. Add in the hammer head end and this is one handy tool.

Hyde's attention to detail ensures our blades will do the job at hand and hold up to the toughest conditions you're likely to encounter. Hyde blades stand up even in the harshest of cutting/trimming applications.

Hyde Part #	Blade Style	Hand	Overall Length
95460	Loop	Right/Left	6.5" / 165 mm

Engineered To "Get The Job Done"

Hyde has engineered this blade to provide long-term edge sharpness and blade life when removing flash waste and excess material from rubber and plastic parts coming off production lines - from bumpers to tires and just about everything in-between. Field tested under the harshest of conditions, Hyde's loop knife is truly a unique and handy tool!

Designed with manufacturing applications in mind, Hyde's Loop Knives make short work of your toughest jobs!
