Industrial Blade Solutions

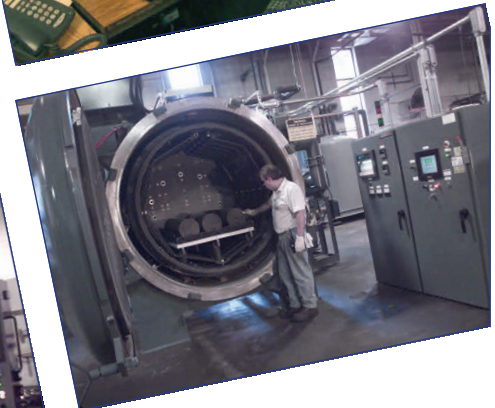

## Custom Fabricated Products

Decades of experience in blanking, heat treating, grinding and machining of a variety of steels provides Hyde with the ability to manufacture a virtually unlimited array of products. Add to that experience the capability to laser cut virtually any shape that can be imagined and you have an extremely versatile facility.

*Rectangular machine knives, cut-off blades, wear plates, brackets, machine parts, separator discs and spacers are just a few of the many products we've manufactured at Hyde. The ability to do the entire job at one location allows Hyde to produce your product in a minimal amount of time and to your exact specifications. You don't need blanking, heat treating, grinding and machining? You just need one or two operations performed on your parts? Not a problem - we'll work with you to do just those operations you need.*

Send us your drawings and specifications, with a sample if possible. Let Hyde be your source for your custom fabricated parts. We are certain you will be pleased with the finished product.

### Inventoried Material Types Include:

Aluminum	316
SAE 1075	410
SAE 1095	440
SAE 8670	M2
SAE 4130	S7
52100	D2
301	A2
Chrome Vanadium and others	

Made in USA

## Custom Fabricated Products

**Blanking/Cutting** - Hyde can make your parts either by blanking or laser cutting. Hyde's press department has a number of mechanical and hydraulic presses ranging in capacities up to 100 tons. Our laser capabilities allow for an infinite variety of shapes to be cut.

**Heat Treat** - Hyde's heat treating department is one of the best equipped in the business. Our hardening furnaces (box, salt bath and vacuum) and tempering furnaces (steam and retort) can handle parts up to 24" diameter or 36" long rectangular from many of the steels we stock.

**Grinding** - Whether your product requires an edge developed by a craftsman's hand or the precision of a machine ground edge, Hyde has the best of both worlds. We have hand grinders with decades of experience and our machine grinding department offers state-of-the-art equipment manned by skilled employees with a multitude of gauging and testing equipment to back them up.

### Capabilities Guide:

**Laser Cutting Services** - up to 4' x 8', and up to 1/2" maximum thickness on mild steel.

**Circular Products** - up to 24" diameter, with thicknesses ranging from .007" minimum to .375" maximum. A variety of bevel angles and edge treatments are possible.

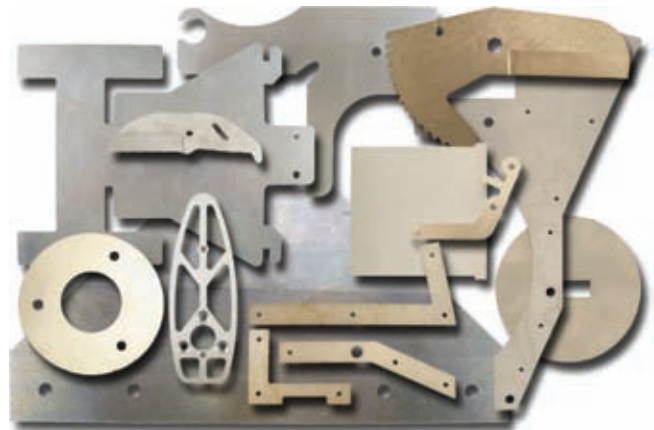

**Rectangular and Other Shapes** - up to 96" length (36" length for heat treating), 20" width and .375" thickness. A variety of bevel angles and edge treatments are possible.

**Hand Knives** - Hyde stocks a more complete line of industrial hand knives than any other manufacturer in the world. Custom made hand knives are manufactured to match special applications. We can make most any shape you require.

Hyde Tools, Inc. is ISO9001 Registered

*"Hyde provided us with a great combination of price and quality, and then delivered it all on-time. I plan to work with Hyde again."*
