Industrial Blade Solutions

Shapes - Circular, Straight, Custom

HYDETM
Industrial Blade Solutions

Hyde Makes Blades & Knives In Virtually Any Shape And Size:

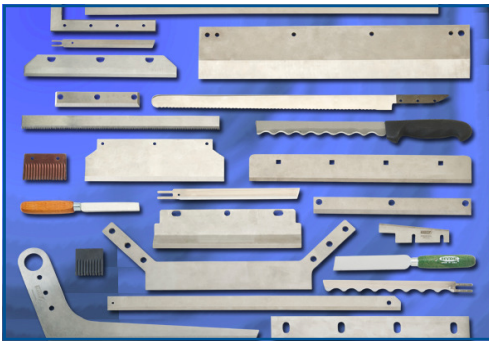

Circular Blades - Hyde quality and circular blades and knives go hand in hand - Hyde has been supplying industry with blades for over 100 years!

We make blades ranging from 1.5" to 24" diameter, as thin as .015" up to .5" thick, from a wide variety of steels (most often right from stock). Need bolt holes or pinholes? Notches or tabs? Slots? Not a problem. With Hyde, you'll get a blade that will do the job, each and every time!

Markets - Food processing, rubber, tire, hose, belting, paper, packaging, paper cores, plastics, film, foam, leather, textiles, metals, foils, abrasives

Applications - Slitting, slicing, skiving, core cutting, slabbing, splitting,

Straight Blades/Knives - The development of straight knives and blades from hand knives was natural for Hyde. Today, Hyde and D&S straight knives are found in virtually every industry.

We work with blades as small as .5" square up 54" long, and as thin as .015" up to 1-1/2" thick, from a wide range of steels (most often right from stock). Need holes/locating pins on your blades? Slots, notches or tabs? Sure thing. With Hyde, you get the blade you need - every time.

Markets - Food processing, rubber, tire, hose, belting, paper, packaging, paper cores, plastics, film, foam, fiberglass, leather, textiles, metals, tube, foils, wood, abrasives

Applications - Cut-off, trimming, slicing, slabbing, splitting, shaping, portioning, chopping, dicing, skinning, sheeting and so many more ...

Custom Shape Blades - Need blades that aren't circular or straight in shape? That's not a problem for Hyde - we make all sorts of custom blades and knives.

Hyde has the expertise to form custom shapes through blanking or laser cutting. Our extensive heat treating abilities ensure the right combination of hardness and durability. Our myriad grinding capabilities allow us to put just about any edge on your specification.

Markets - Food processing, rubber, tire, hose, belting, paper, packaging, paper cores, plastics, film, foam, fiberglass, leather, textiles, tube, metals, foils, wood, abrasives

Applications - Cut-off, slicing, trimming, slabbing, splitting, shaping, portioning, chopping, dicing, sheeting and so many more ...

Rotors - If you're looking for OEM quality rotors, trust PDK. For nearly 100 years, PDK has been leading the way supplying quality products to the plastics processing industry.

Solid and wedgelock rotors are available, in D2, CPM10V, carbide and stellite. Rotors are available from 2" to 40" wide, and from 6" to 12" in diameter. We can supply new rotors and we can sharpen and/or repair your existing rotors - we've got you covered.

Markets - Plastics compounding and processing

Applications - Pelletizing
