We hope you'll find something of interest to you and your business in this issue of The Cutting Edge. We'd like your feedback on what you would find helpful in upcoming issues. E-mail us at [info@hydeblades.com](mailto:info@hydeblades.com)

Thanks to all entrants for your submissions.

### LEADING EDGE PRODUCT:

**NEXT GENERATION HOSE HOG BLADE DESIGN**  
ENGINEERED FOR CUTTING THROUGH TOUGH WIRE BRAID AND WIRE-REINFORCED HYDRAULIC HOSE

A new leading edge design of our **Hose Hog Circular Blades** improves cutting effectiveness of wire-reinforced hose and tube materials by introducing more blade surface area into the cut, which makes them more efficient than the standard or wavy scallop blades.

Toothed and beveled on **both** sides of the blade, this next generation of blades moves through the toughest materials while leaving smooth cuts time after time.

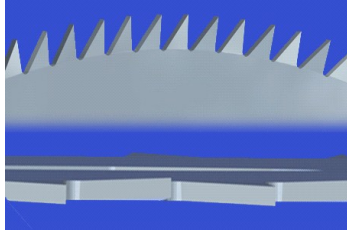

**Our Solid Steel Offer:**  
Receive a refund if you are not satisfied with our product in the first 60 days!

[Request Information](#)

We've also expanded our popular line of Hose Hog Circular Blades from the most popular 10" size to include 7", 8", 12" and 14" diameters as well.

## **LEADING EDGE PRODUCT: HIGH-PERFORMANCE SET TOOTH FOOD GRADE BLADES WON'T BIND THROUGH THE CUT**

Designed for any food processing application where tight cutting clearances exist, new **Set Tooth Food Grade Blades** from Hyde IBS moves quickly and cleanly through the cut to avoid the damage experienced by competitive blades when material closes in on them.

Popular in red meat and pork processing and bakery cutting applications, these blades are perfect for dehiding, hock and horn removal, leg cut-off, carcass cutting, breaking and splitting, slicing and more.

Hyde Set Tooth Food Grade Blades are available in a range of diameters from 3.5" – 21" and per blade tooth configurations ranging from 4 to 240.

## **LEADING EDGE PRODUCT: NEW RANGE OF CORRUGATED KNIVES PROVIDES CLEAN AND PRECISE CUTS**

Available in a variety of steel alloys to match your specific application, a new range of machine knives for cutting and scoring corrugated material and paper products is available. **Hyde IBS Corrugated Blades** are manufactured to meet OEM standards for the majority of equipment in the field today.

The line includes cut-off knives, slitting and trimming knives, scoring and creasing knives, slotters, tab knives and more.

## **GENERAL ANNOUNCEMENTS: MEMBERSHIP IN INTERNATIONAL SAW AND KNIFE ASSOCIATION MAKES THE WORLD A SMALLER PLACE**

Hyde IBS has been accepted into the International Saw and Knife Association (ISKA), a non-profit organization designed to benefit saw and knife shop owners, sharpening operations and companies involved in cutting operations. Founded in 1965 as the National Association of Saw Shops, ISKA now has members throughout the United States, Canada and Europe, and is dedicated to improving the technical knowledge and business operations of those in the cutting industry.

Since being founded by Isaac P. Hyde in 1875 when he started selling to the leather and shoe industries, Hyde has long-standing associations with those companies and organizations committed to enhancing and furthering the manufacturing business. We are pleased to be part of this fine organization.

Visit the ISKA website at: [www.iska.org](http://www.iska.org)

## **CUSTOMER FEEDBACK:**

What would you like to see in the next issue? What do you think about the new look? Please feel free to share your feedback with us at [info@hydeblades.com](mailto:info@hydeblades.com).
